

## Remote Access to your computer Pictures, Files, Videos and Music, sharing, and more.

Starts at **\$9.95** /year/computer  
(Unlimited LAN and data transfer)

Carry your own personal cloud wherever you go. Avoid third-party cloud or the need to change your IT infrastructure. Whether you need to share a file or work on MS Office files with your team, ZipDrive is ideal for all your file access and file sharing needs.

### Have a look at ZipDrive key features:

**Remote file access** - Stream files on your PC, Mac, or Linux, as well as connected external drives via web or mobile.

**File/Folder operations** - Upload, download, or move files/folders; share items on the computer via a share link.

**Fast uploads via mobile** - Upload all your mobile photos and videos in one click with the mobile app.

**Work with MS Office files** - Edit and save Office files without leaving ZipDrive; teams can co-edit files in real-time.

**Secure access** - All sessions are secured with TLS v 1.2 encryption; additional security with trusted device or two-step verification.

**Add users** - Invite and add users to your account; users can add their computers.

### Here's what the experts say:

**TECH ADVISOR**  
FROM IDG

A new feature is ZipDrive, which acts as a personal cloud service that turns your PC into a kind of server which allows you to access files on your other devices via the web.

- Martyn Casserly

**c|net**

This handy service turns your PC into a secure file server for photos, music, movies and more.

- Rick Broida

**techradar pro**

ZipDrive looks to offer cloud storage with some security bonuses.

- Anthony Spadafora
